## WHAT DOES IT TAKE?

*Research how to care for a vineyard.*

*You will need:*

- † Internet-connected devices
- † Paper
- † Pens or pencils

*Preparation:*

1. Verify that participants will have access to a reliable Internet connection.
2. If you do not think participants will have enough Internet-connected devices to have at least one per small group, decide how you might provide them.

*Instructions:*

1. **Today we heard a story about a vineyard. Many of us might not know much about vineyards, or growing grapes, so we are going to spend some time looking online to see what we can learn.**
2. Divide the participants into small groups or allow them to choose their own groups. As they research, have them take notes. When they are finished, have them share what they learned.
